EIOPA publishes its opinion on the scope of DORA in Solvency II Review

Latest developments

On 15 November 2024, the European Insurance and Occupational Pensions Authority (EIOPA) published its [Opinion](#) on the impact of the increased size thresholds regarding exclusion from scope of Solvency II as part of the Solvency II Review on insurance undertakings in the scope of the Digital Operational Resilience Act (DORA).

The amended Solvency II Directive raises the size thresholds for insurance and reinsurance undertakings, which may lead, subject to national transpositions, to more companies being excluded from the Solvency II framework. However, these undertakings are required to comply with the DORA from its date of entry into application on 17 January 2025, while at the date of application of the reviewed Solvency II framework might be exempted from DORA.

In its Opinion EIOPA calls on the European Commission (EC) to take the necessary actions to avoid disproportionate compliance efforts from small insurance undertakings in the transition period prior to the application of the revised Solvency II Directive.

Next steps
