Subject: RFR monthly monitoring – August 2024

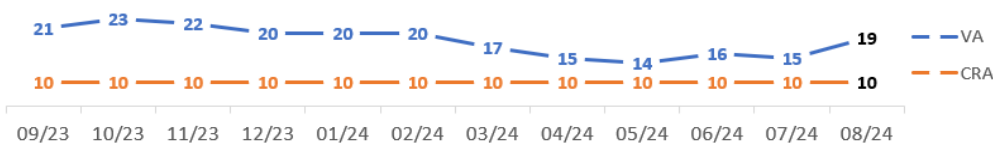

Background

EIOPA publishes technical information related to [risk-free interest rate](#) (RFR) term structures for a wide range of currencies and the [symmetric adjustment](#) of the equity capital charge monthly. The latest technical documentation for the RFR which provides EIOPA's methodology for calculation can be found [here](#). The secretariat monitors EIOPA's RFR curves published for the euro as well as the symmetric adjustment and provides below summary information for members (Source: EIOPA, Insurance Europe).

1. RFR curves with VA (euro) as at the end of August 2024 vs previous curve

2. Change in Volatility Adjustment and Credit Risk Adjustment

3. Impact on discounting

The value after discounting a 1,000 euro cashflow at different years in the future is shown below, along with the impact of changes in RFR (with VA) on these valuations:

	10yrs	20yrs	60yrs
Present Value using August 2024 RFR with VA	771	593	173
Present Value change from the previous month	-0,2%	-0,4%	-1,0%

4. Symmetric Adjustment of the Equity Capital Charge
