 Subject: RFR monthly monitoring – November 2023

Background

EIOPA publishes the technical information related to [risk-free interest rate](#) (RFR) term structures for a wide range of currencies and the [symmetric adjustment](#) of the equity capital charge monthly. The latest technical documentation for the RFR which provides EIOPA’s methodology for calculation can be found [here](#). The secretariat monitors EIOPA’s RFR curves published for the euro as well as the symmetric adjustment and provides below summary information for members (Source: EIOPA, Insurance Europe). Additional information on the alternative extrapolation method proposed by the EC as part of the Solvency II review is included for reference only.
