Subject: EP Publishes Draft Report on EC's proposal to boost InvestEU guarantee efficiency and streamline reporting

## Summary

On 25 April, the European Parliament published a Draft Report, prepared jointly by the Committee on Budgets and the Committee on Economic and Monetary Affairs, in response to a legislative proposal (COM(2025)0084) from the European Commission: [here](#).

The [proposal](#), initially presented in February 2025, seeks to amend four major EU regulations governing key investment and funding programmes.

The core objective of the Commission's proposal is to amend the InvestEU Regulation to allow for a more efficient use of existing resources. This would be achieved by increasing the size of the EU guarantee, enhancing its provisioning through reflows from the European Fund for Strategic Investments (EFSI) and other legacy financial instruments, and combining InvestEU operations with support from the Union budget previously allocated to EFSI and similar programmes.

Specifically, the proposed regulation would amend the following EU laws:

- Regulation (EU) 2015/1017 (EFSI Regulation),
- Regulation (EU) 2021/523 (InvestEU Regulation),
- Regulation (EU) 2021/695 (Horizon Europe),
- Regulation (EU) 2021/1153 (Connecting Europe Facility).

As part of its overarching aim, the proposal also seeks to simplify reporting requirement especially for small businesses and smaller projects, as part of its broader objective to make EU investment support more efficient and less burdensome.

This Draft Report forms part of the ordinary legislative procedure, in which the European Parliament and the Council of the EU review and negotiate legislative proposals initiated by the Commission.
